

MAXIMIZE YOUR SAGE INVESTMENT WITH EDISOFT'S EDI SUITE

Your investment in a Sage Software product demonstrates your commitment to partner with companies who believe in being the best. Edisoft's EDI suite of products enables you to continue the tradition of excellence. Edisoft provides the tightest integration with Sage Accounting and ERP Solutions that is available out of the box, the highest return on your investment and a belief that EDI should benefit you as much, or more, than it does your trading partners. Edisoft has product offerings that are compatible with the entire line of Sage Accounting and ERP Solutions. Multiple editions of each product also mean that Edisoft's EDI suite can be used by the smallest of operations and scaled up to manage the needs of much larger organizations. Our unique product architecture allows you to maximize your Sage Software investment and ensures EDI compliance without compromising your business and its processes.

MORE THAN JUST EDI

Don't let the name fool you, although we have the best EDI products available to the Sage Accounting and ERP Solutions market, Edisoft is more than just EDI. Our Visual ASN product coupled with Sage Accpac ERP, Sage MAS 90 ERP, or Sage MAS 200 ERP allows our users to achieve a level of shipping automation that normally requires a much larger investment. Visual ASN links directly into the ERP system and streamlines the picking, packing, labeling, and order process automation for both EDI and non-EDI customers.

Simply Accounting by Sage

SAGE ACCPAC ERP

Edisoft has a 15 year proven track record of helping Sage Accpac users streamline their EDI order process and maximize their ROI when choosing an EDI solution.

For over a decade Edisoft has been revolutionizing the way that Sage Accpac users fulfill orders and automate their shipping processes with one of their two Sage Accpac specific solutions: Edisoft Merchant for Sage Accpac and Visual ASN for Sage Accpac.

Edisoft Merchant for Sage Accpac Business Exchange Edition is intended for smaller clients with straightforward order and invoice needs (850/810 or 875/880). Purchase Orders received into Edisoft Merchant are posted directly to Order Entry via the XAPI. Once a sales order has been converted to an invoice Edisoft Merchant will read this information directly from the Order Entry module and create the corresponding, compliant EDI invoice. For larger clients and customers whose needs go beyond these simple requirements Edisoft Merchant for Sage Accpac Advanced Edition is available.

Visual ASN for Sage Accpac offers not only ASN compliance, but a shipping automation solution that is unparalleled in the Sage Accounting and ERP Solutions market.

Visual ASN reads sales order/shipment information directly from Sage Accpac making it available to members of the shipping team without having to open Sage Accpac. Multiple sales orders can be linked together into one shipment in order to ensure that they are processed together as one physical shipment. Clients have the option of Visual ASN Lite which allows users to Pick and Pack or to upgrade to Visual ASN with the ability to setup packing rules enabling the auto packing of simple case packs or assorted case packs. Once the packing of orders is complete, GS1-128 labels have been printed, and all packing details have been confirmed Visual ASN can update Sage Accpac triggering the creation of invoices for all orders included in the shipment.

SAGE MAS 90 & 200 ERP

Edisoft Merchant for Sage MAS 90 and MAS 200 enables users to streamline their entire order fulfillment process with one seamlessly integrated system. Taking advantage of the Sage MAS Object Interface, Edisoft Merchant for Sage MAS 90 and MAS 200 writes Purchase Order information directly into the Sage MAS Sales Order tables. Clients whose needs are limited to orders and invoices (850/810 or 875/880) can take advantage of Edisoft Merchants Business Exchange Edition. For larger clients and customers whose needs go beyond these simple requirements Edisoft Merchant for Sage MAS 90 and MAS 200 Advanced Edition is available.

Users can enhance the shipping process and ensure ASN compliancy to their system with the addition of Visual ASN or Visual ASN Lite. Both Visual ASN solutions read Sales Order information directly from Sage MAS 90 and MAS 200 making it available to

members of the shipping team without having to open Sage MAS 90 or MAS 200. Multiple orders can be linked together into one shipment in order to ensure that they are processed together as one physical shipment. Both Visual ASN Lite and Visual ASN support drag and drop packing which enables users to easily assign items to cartons, and/or cartons to pallets. For more complex ASN packing requirements such as auto packing rules, assorted case pack rules, and batch shipping to name just a few, clients have the option of upgrading to Visual ASN. Once the packing of orders is complete, GS1-128 labels have been printed, and all packing details have been confirmed Visual ASN can update Sage MAS 90 and MAS 200, writing packing information back to the Shipping Data Entry screen. While the packing information is being written back to Sage MAS, invoicing can also be triggered which saves you time, effort and streamlines your order fulfillment process every day.

SAGE MAS 500 ERP

Continuing Edisoft's tradition of providing flexible, yet powerful EDI solutions for the Sage Accounting and ERP Solutions market, the Edisoft family of products extends to include Edisoft Merchant for Sage MAS 500. Using the Order Entry tables, and the SAGE MAS 500 business rules, orders that are received are posted directly into Edisoft Merchant for Sage MAS 500 (via the Sage MAS 500 API). Edisoft Merchant for Sage MAS 500 maintains a cross reference of both item and location codes ensuring that order information never has to be rekeyed into MAS 500. Once orders have been shipped and invoiced in Sage MAS 500, invoice information is read directly from the Sage MAS 500 invoice tables, pulled into Edisoft Merchant for Sage MAS 500 and converted to the compliant EDI format. Our unique trading partner template technology allows this to be done with just a few clicks of a mouse.

The option to implement Visual ASN integrated directly to Edisoft Merchant for MAS 500 makes picking, packing, and shipping easier than ever. Once pick orders have been created in Merchant for MAS 500 they are ready to be packed in Visual ASN by members of the warehouse staff. Whether it is simple pick and pack procedures, taking advantage of drag and drop features, or more advanced auto packing features, Edisoft has a version of Visual ASN that will work for your business.

PEACHTREE BY SAGE, SIMPLY ACCOUNTING BY SAGE AND SAGE PRO ERP

Edisoft Merchant Flex has a foundation that has built integration to Peachtree by Sage, Simply Accounting by Sage and Sage Pro by mimicking an order entry system. Orders that are received into Edisoft Merchant Flex are posted to the internal sales order tables. Once that has been completed they can be exported in the appropriate format (pre-defined within Edisoft Merchant Flex in accordance to Sage Software's specifications) for each accounting system. This combined with tables containing item and location cross reference table enables users to export data to their accounting system of choice without rekeying any data. Invoices created in the accounting system can be imported back into Edisoft Merchant Flex's invoice tables facilitating users to use the data supplied by the accounting system and quickly convert numerous invoices to the appropriate EDI format as required by their trading partners.

The Visual ASN integrated directly to Edisoft Merchant Flex option makes picking, packing, and shipping easier than ever. Once pick orders have been created in Edisoft Merchant Flex they are ready to be packed by warehouse staff in Visual ASN. Whether it is Visual ASN Lite's simple pick and pack procedures, or drag and drop features, or you take advantage of Visual ASN's more advanced auto packing features, Edisoft has a version of Visual ASN that will work for your business.

**THE FIRST AND LAST
EDI SOLUTION YOU'LL EVER NEED**
