

THE FIRST AND LAST EDI SOLUTION YOU'LL EVER NEED

In today's world, simply being EDI compliant with your trading partner is not good enough. Of equal importance is ensuring that your systems will give you the edge to succeed over the competition. The choices you make today can determine your success or failure in the future. A system that will scale up as your company grows ensures that you can grow your company with complete peace of mind. Edisoft's Merchant suite of EDI products is the first and last EDI solution you'll ever need.

YOUR ONE STOP SHOP

EDISOFT MERCHANT OFFERS THE FOLLOWING FEATURES:

- Built in communications module
- Support for all major Value Added Networks
- Built in ANSI X.12 EDI translator
- Direct connection to numerous ERP systems using native APIs (ensures optimization of ERP business rules)
- Thousands of pre-built trading partner kits
- No Re-Keying for commonly used documents resulting in the elimination of Non-Compliance charges due to human error

MERCHANT BUSINESS EXCHANGE

Merchant Business Exchange enables your business to trade order and invoice documents with up to 5 trading partners. By including support for Edisoft's Business Exchange Value Added Network, and the ability to easily upgrade to Merchant Advanced, Edisoft Merchant allows you to enable your trading relationships now, and continue to grow your system in the future.

MERCHANT ADVANCED

Do you have complex EDI or a large customer base to service? Merchant Advanced supports an extended X.12 document base, including the Advanced Ship Notice, an unlimited number of trading partners and integration to Visual ASN. You'll never have to search for a new EDI solution again.

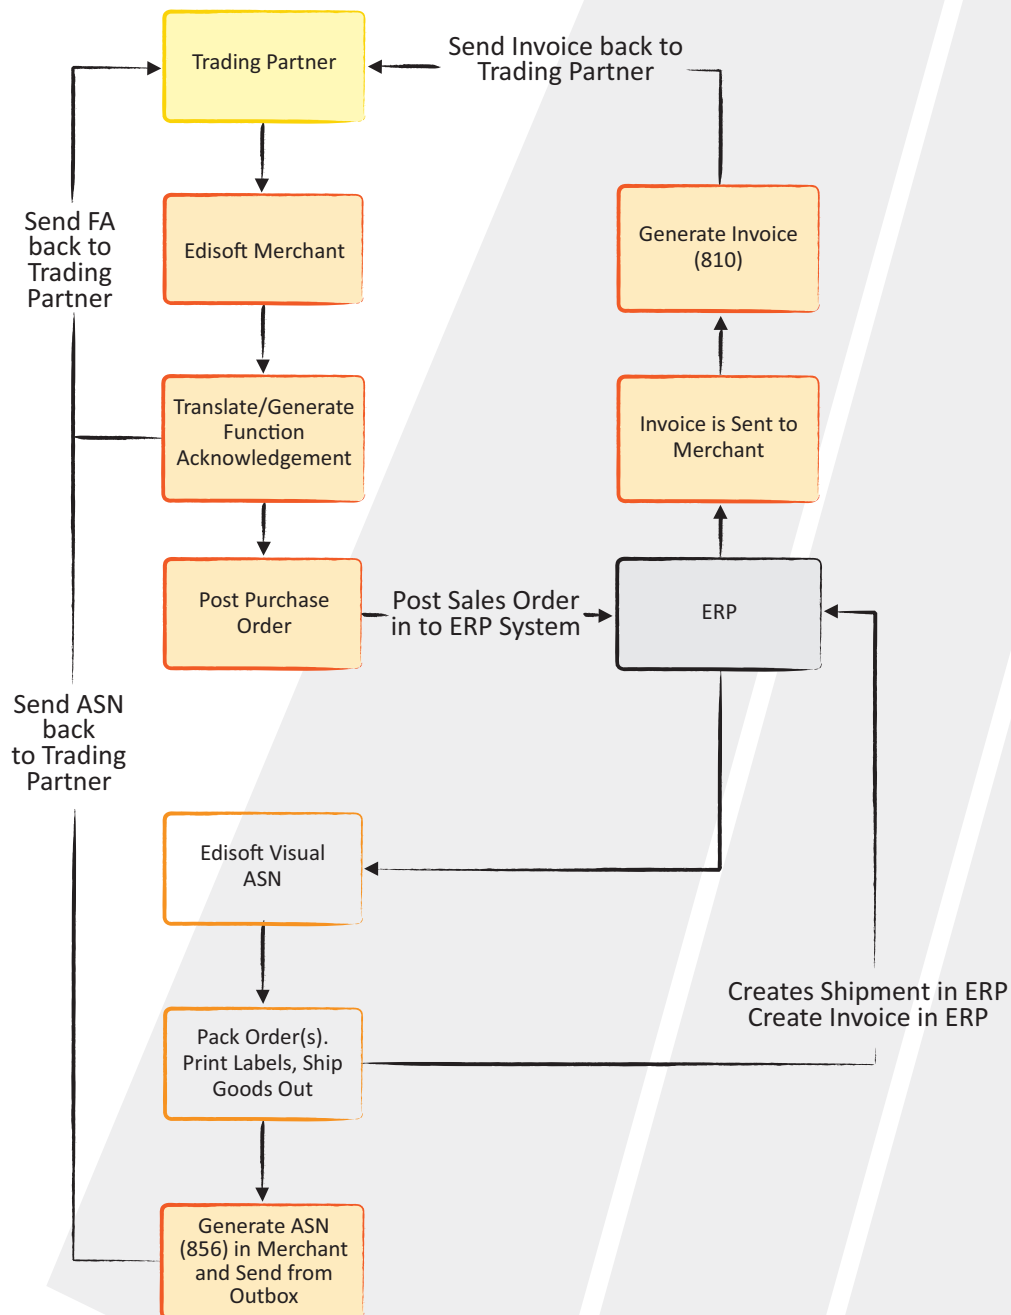

WHY EDISOFT MERCHANT?

Often, EDI solution providers will represent a system that is a composite of solutions from different vendors. Supporting a multi-vendor solution can lead to escalating costs and a higher TCOI. All of Edisoft Merchant's components are built and supported by Edisoft. That means that we know our product inside and out and in the event that something does go wrong you have only one vendor to call for help. With all of the components you need and years of expertise; the Edisoft team can support your EDI needs now and into the future.

EASY IN... EASY OUT

Merchant's EDI suite of products provides an easy, efficient manner to conduct business with trading partners, following existing business practices. With our integration strategy, users are often able to get more work done with less staff involved. Linking Edisoft Merchant and Visual ASN (as illustrated below) provides a complete workflow that keeps things simple.

**THE FIRST AND LAST
EDI SOLUTION YOU'LL EVER NEED**
