

NEW RELEASE : MERCHANT 6.1 FOR SAGE 300 ERP (formerly Sage Accpac)

Edisoft's Merchant 6 brings a host of new features and benefits to you including a SQL server database, SData support, date filtering options and multi-window support.

Feature Highlights...

Feature	Benefit
SQL Database Support :	<i>Faster, secure and data integrity. Compatible with SQL 2005 SP2 and above.</i>
SData Support :	<i>Support for Sage's current and future communication protocol, SData.</i>
Date Filtering :	<i>Show only documents created after a certain date, cleaner interface.</i>
Multi-Window Support :	<i>Allows the user to open up multiple screens within Merchant without having to close out of the current screen improving efficiency.</i>
Enhanced ASN/856 :	<i>Enhanced ASN modules are available. Contact us for more information on the best solution for you.</i>
Sage 300 2012 (6.1) Support :	<i>Support for Sage 300 ERP 2012 (6.1). Also compatible with Sage 300 ERP 5.6 and 6.0. Contact us to inquire about compatibility with the version of Sage 300 you are currently using.</i>
Microsoft Windows 8 Compatible :	<i>Compatible with Microsoft's Windows 8 operating system. Also backwards compatible with 32 and 64 bit versions of Microsoft Windows XP, Microsoft Windows Vista and Microsoft Windows 7.</i>

Summary of key benefits...

New for Merchant 6 is the support for Microsoft SQL Database. SQL supports higher data volumes and improved data integrity. Microsoft SQL by design employs a client/server approach versus a file server design, that reduces the risk of data corruption. SQL also gives you the ability to use reporting tools such as Crystal Reports, Excel etc... to collect and report.

Sage Data (SData) is new for 2012 and is Sage's next generation of API. It is a HTTP based web communication protocol used by Accpac Online but is also new for Sage 300 ERP 2012 (6.1). Edisoft continues to support XAPI (the previous Sage 300 ERP API) as well as SData in future versions.

Other Features include...

The date filtering options available in all screens of Merchant 6 allow users to hide older documents that will never be processed and giving the ability for the user to purge data out of Merchant without having to purge data out of Sage 300 ERP.

Multi-window is also new for Merchant 6 allowing you to open up multiple windows within Merchant. For example you can now open up the Outbox and the Process Ship Notice/Manifest 856 screen at the same time!

Please contact your Sage 300 ERP dealer or call/email in and book an appointment with one of our certified technicians to update you to Merchant 6 and experience the benefits now!
